[linkedin.com/in/bernardofbbbraga](https://www.linkedin.com/in/bernardofbbbraga)  
Vitória, ES – Brazil

Extensive experience in representing information in real-time dashboards, mobile and narratives. Started and led two start-ups through funding pitches, customer relationships and product development. Created a data annotation tool that reduced cost in 38% while increasing tag count by 283%. Led a team of 4 as an employee. Looking for a cooperative environment to create engaging user experiences.

## WORK HISTORY

### INTELIE (2018 – 2021)

#### Frontend Developer

- Improved the real time data analytics dashboard and widget platform
- Developed the new generation of no-code widgets
- Developed the plugins to support a new oil & gas vertical
- Co-founded the front end chapter to support developers

### INTELIE (2021 – 2021)

#### Product Team Leader

- Planned roadmap of Augmented Intelligence tools
- Led and managed a team of 4
- Managed OKRs
- Developed user analytics and product integration

### MENTHOR (2016 – 2018)

#### Frontend Developer

- Developed a proof-of-concept video annotation tool for Globosat's video archive sector that made task 40% faster, while increasing the amount of tags per scene by 280%
- Developed a search tool for the tagged content
- Presented sprint iterations to clients and aligned priorities
- Coordinated the development team and designer to make sure that the stakeholder's needs were met
- Founded the startup as a spin-off from Master's degree research

### BOGEYBOX (2011 – 2013)

#### Frontend Developer

- Developed interactive books for the iPad using a cross platform framework
- Explored the affordances of mobile platforms for innovative, interactive and immersive storytelling
- Exhibited appbook in the International Electronic Languages Festival in 2012 and 2013
- Third place in a national startup competition
- Founded the startup in the early days of the smartphone revolution
